

Continuous connection drives performance

Modern procurement teams are looking for new technology to automate processes and better collaborate with suppliers, most solutions don't offer a single platform to manage the full procurement lifecycle.

4Links has launched a suite of cloud based Apps that enable buyers to achieve new levels of efficiency, visibility & probity across their supply network. Our most innovative feature is a range of live trading tools that enable continuous connection with suppliers in real time, to source products & services that match your requirements using competitive price tension to improve performance.

Managing your supply chain becomes easy with 4Links as a single solution to the full procurement lifecycle, using global best practice standards with unlimited user access, very rich feature set, and the best value compared with any software solution in the market.

Marketplace SRM

Our SRM App Marketplace connects you with your suppliers and our live trading platform. Marketplace maps suppliers, products & services against global standards and provides detailed spend analytics enabling predictive spend planning, Build a supplier panel in minutes and connect them to eCheck to fully automate your compliance process.

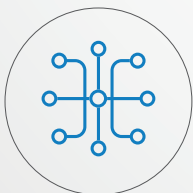

Strategic Sourcing

Procurement teams are rapidly becoming performance based business units, but you need quality data and innovative technology to achieve your targets. The traditional approach to procurement with long cycle tenders seen as the core leverage is being replaced with live trading tools enabling rapid access in a constantly changing world. It's about the power of being connected, imagine the impact of tracking daily price movements on key commodities & services and being able to move when seasonal or market fluctuations arise. Our live trading tools create market tension to enable rapid response and massive cost savings.

Compliance

Compliant suppliers & staff means faster engagement and lower risks. 4Link's eCheck is an enterprise wide, automated compliance & pre qualification platform. Free to suppliers via a self service dashboard, it's a complete solution for: business, individuals, professionals & trades, products & WHS regulations. It also offers suppliers the benefit of having a single online file for all their compliance documents.

Collaboration

Collaboration is the key to achieving visibility, control, and a single point of truth in managing the complex mass of transactions and communications you have each day with your supply chain.

Your change catalyst starts by pulling your supply chain into a single cloud platform. This enables access to market & supplier data, spend & cash burn analysis, easy management of contract terms & KPI's and performance. Our collaboration tools are integrated into all core applications, you manage everything via smart dashboards giving you rapid access to critical data & custom reports all while your system self-manages supplier compliance risks and WHS obligations.
